

Building business views

**Create application
components**

Create Application Components Wizard

- Display Card
- Form
- Collection
- Stepper
 - Authoring
 - Duplicate Management (If fuzzy matching)
- Business View
- Related application

The screenshot shows a Windows-style dialog box titled "Create Application Components". Inside, there's a section "Application and Features" with the instruction: "Select the application into which a business view will be created and whether it supports authoring." Below this, there are several configuration options:

Option	Value
Display Card	CustomerDisplayCard
Form	CustomerForm
Collection	CustomerCollection
Action Set	CustomerActionSet
Enable Authoring	☒
Enable Duplicate Management	☒
Create Business View	☒
Show in	Default Application

At the bottom right, there are four buttons: "< Back", "Next >", "Finish", and "Cancel".

Further configuration will be needed (eg. to format the forms, collections, add transitions to Business Views – but it is a great start!)
