

Information: Action Sets - Authoring Actions

The following Data Authoring Actions require a **Stepper** or a **Workflow**

- **CREATE** - Triggers the creation of one or more master or golden records
- **EDIT** - Triggers the modification of one or more master, golden or erroneous records
- **MASS UPDATE** - Allows for the modification of multiple values in a set of records
- **IMPORT** - Imports master or golden records from CSV or Excel
- **COPY** - Copies one or more records

The following Actions do not require a **Duplicate Manager/Workflow/Stepper**

- **EXPORT** records to CSV or Excel
- **EXPLAIN RECORD** to graphically view the matches and consolidated values
- **DELETE** master or golden records (See the module DELETION - Deleting Records)
- **BROWSE GRAPH** - Opens the graph navigation view of one record to see the relationships from and to this record
